

FOR JERRY CAN DISPENSING

Jerry Can Dispensing Containers incorporating the **38mm Aperture[®] Irremovable Cap** provides a simple, safe and secure solution to the dispensing of chemicals.

Problem:

Manufactured Jerry Can Containers are designed to pour their liquid contents from within and are not suitably designed for controlled dispensing devices, allowing for unrestricted dispensing methods.

The **Aperture[®] Irremovable Cap** container combination solves this problem.

Used with a peristaltic pump, or dosing device,

CONTAINER DESIGN

10L / 20 L Litre Jerry Cans features a robust carry handle with four location features allowing units to stack securely.
